Maintenance Checklist for 2FSMV Sander with Vacuum

Daily Maintenance

- **Inspect the Belt:** Check for wear and tear. Replace if necessary.
- **Clean the Sander:** Wipe down the exterior and remove any dust or debris.
- **Check the Vacuum System:** Ensure the vacuum is functioning properly and the filter is not clogged.

Weekly Maintenance

- **Deep Clean the Sander:** Disassemble and thoroughly clean all parts.
- **Inspect and Clean the Vacuum Filter:** Replace the filter if it is excessively dirty or damaged.
- **Check for Wear on the Platen and Work Table:** Replace if necessary.

Quarterly Maintenance

- **Inspect Motor and Bearings:** Check for any unusual noises or vibrations. Lubricate or replace as needed.
- **Check Safety Guards:** Ensure all safety guards are in place and functioning correctly.
- **Review Overall Performance:** Assess the sander's performance and address any issues.

Annual Maintenance

- **Full Inspection:** Conduct a comprehensive inspection of all components.
- **Replace Worn Parts:** Replace any parts showing significant wear.

Regular maintenance will help keep your Kalamazoo 2FSMV sander running efficiently and extend its lifespan.
