KM10 10-Inch Mitre Saw Maintenance Checklist

Daily Maintenance (Before/After Use)

- **Clean the saw:** Remove dust, debris, and metal shavings using a brush and compressed air.
- **Inspect the blade:** Check for wear, missing teeth, or cracks. Replace if damaged.
- **Check blade guard:** Ensure it moves freely and retracts properly.
- **Inspect power cord:** Look for fraying, cuts, or exposed wires.
- **Test switch:** Confirm it engages and disengages properly.

Weekly Maintenance

- **Check V-belts:** Look for wear or slack; tighten or replace as needed.
- **Inspect fasteners:** Tighten any loose bolts, screws, or nuts.
- **Check blade alignment:** Verify the blade is square to the fence and table.

Monthly Maintenance

- **Check carbon buildup:** Clean motor vents and housing.
- **Inspect bearings:** Listen for unusual noise or vibration; replace if needed.
- **Test mitre locks:** Ensure they hold angles securely.

Annual Maintenance

- **Full inspection:** Disassemble key components for deep cleaning and inspection.
- **Replace worn parts:** Bearings, brushes, belts, or switches as needed.
