

## Power Up Your Workflow with the KS390V Belt Grinder with Vacuum Base

If your shop is pushing metal every day, you already know how important it is to have equipment that keeps up with the work. The KS390V 3" x 90" Metal Belt Grinder with Vacuum Base is built exactly for that—steady performance, clean operation, and the durability Kalamazoo Industries is known for.

Whether you run a fabrication shop, metal working shop, or a full-scale iron foundry, this machine gives you the speed and consistency needed for tough, daily grinding jobs.

### Why Fabricators Love the KS390V

This grinder isn't just powerful—it's a true production tool. Here's what makes it stand out in busy fabrication environments:

- **Cleaner workspace:** The built-in 100 CFM vacuum collects dust and debris right at the source, helping keep grinding areas cleaner and reducing cleanup time.
- **Fast stock removal:** Paired with 3" x 90" abrasive belts, the KS390V moves metal quickly so teams can stay on schedule.
- **Built for heavy use:** Thick steel construction, a rigid platen, and direct-drive power make it a long-lasting professional tool for daily grinding.
- **Improves workflow:** Operators can switch belts fast, adjust the work area, and keep production flowing without unnecessary downtime.
- **Country of Origin:** Made in USA

### Ready to Upgrade Your Shop?

Now is the perfect time to bring the KS390V into your operation. Boost productivity, improve cleanliness, and give your team a grinder built for real industrial work.

### Where This Grinder Really Shines

- The KS390V is especially valuable for shops that focus on:
- Custom stainless steel fabrication
- Production grinding
- Precision shaping and smoothing
- Grinding welds, edges, brackets, and fixtures
- Metal finishing and prep for coatings

If you need reliable, repeatable results, this machine has the power and build quality to support your workflow every day.
