

Forge-Grade Precision: The Kalamazoo 2FS72 Belt Grinder

When it comes to shaping, refining, and sharpening blades, every detail matters. The Kalamazoo 2FS72 2 x 72 Inch Belt Grinder (Less Motor) is engineered for craftspeople who demand accuracy, power, and durability. Designed for blacksmiths, bladesmiths, and metal artists, this grinder provides the foundation for achieving professional-level results with consistency and control.

Engineered for Precision Work

The 2FS72 accepts standard 2" x 72" abrasive belts, making it ideal for a range of metalworking applications—from heavy stock removal and shaping to fine finishing and polishing. Its robust, all-steel construction minimizes vibration, ensuring smooth, stable operation even under demanding conditions.

Customizable Power

This model is V-belt driven and designed to accommodate your choice of a 1 to 2 HP motor, allowing you to tailor speed and torque to your specific grinding requirements. Whether you prefer high-speed stock removal or controlled finishing passes, the 2FS72 adapts seamlessly to your workflow.

Precision Tracking and Belt Control

The machine's adjustable tracking system keeps abrasive belts running true, reducing wear and improving finish consistency. Quick belt changes let you move efficiently between coarse and fine abrasives, saving time while maintaining quality results.

Ideal Applications

- Custom knife and tool making
- Blacksmithing and bladesmithing
- Forging and metal restoration
- Tool and die finishing
- General metal fabrication

Performance You Can Trust

With over five decades of manufacturing excellence, Kalamazoo Industries continues to set the standard for industrial-grade grinders and sanders. The 2FS72 is built to deliver reliable performance year after year, standing up to the rigorous demands of professional workshops and forges.

Product Highlights

- Accepts most 2" x 72" belts for ferrous and non-ferrous applications
- Belt direction is counterclockwise when viewed from the motor end
- Precision-balanced pulleys for smooth belt operation
- Built for flexibility — start with the 2FS72 and expand as needed
- Proudly Made in the USA

Equip Your Shop for Excellence

The 2FS72 offers the versatility, strength, and precision today's bladesmiths and metalworkers rely on. Whether you're refining a forged blade, sharpening an edge, or preparing metal for heat treatment, this grinder delivers the consistent results professionals expect.
