Kalamazoo K10HS

Precision. Power. Performance.

Product Overview

The Kalamazoo K10HS is a rugged, American-made high-speed saw built for precision and performance. Designed to work seamlessly with a non ferrous saw blade, this industrial-grade machine is the ideal chop saw for aluminum, brass, copper, and plastic. Whether you're in fabrication, aerospace, or extrusion, the K10HS delivers clean, burr-free cuts with every pass—making it a top choice for non ferrous cutting applications.

Applications:

Perfect for machine shops, fabrication facilities, and production lines that require high-speed, high precision cutting of non-ferrous materials.

Key Benefits

Benefits include:

- Clean, burr-free cuts on aluminum, brass, copper, and plastic
- 3450 RPM spindle speed for fast, efficient cutting
- 3 HP motor available in 1PH and or 3PH configurations
- Heavy-duty cast iron base and cast aluminum arm for durability
- Cam-lock vise for quick and secure clamping
- Retractable clamshell guard for operator safety
- Threaded up/down stops for adjustable blade depth
- Compact footprint with manageable shipping dimensions

Made in the USA

Technical Specifications

- Motor Options: 3 HP, 3-Phase (220V or 440V) or 3 HP, 1-Phase (110V or 220V) – Specify phase and voltage
- Spindle Speed: 3450 RPM
- Material Capacity: 3.25" solid or pipe
- Blade Type: High-speed carbide blade (not included)
- Spindle Arbor: 5/8"
- Drive System: V-belt driven with sealed ball bearings
- Construction: Cast aluminum arm, cast iron trunnion, heavy-duty cast iron base
- Safety Features: Manual on/off switch, retractable clamshell guard, V-belt guard
- Vise: Cam lock vise
- Shipping Dimensions: 30" L × 36" W × 30" H
- Shipping Weight: 200 lbs
- *Shipping weight and dimensions are subject to change*
