Kalamazoo KM10 10" Industrial Mitre Saw

Precision Cutting Power for Industrial Applications

The Kalamazoo KM10 is a robust 10" industrial abrasive mitre saw designed for precision cutting of mild steel and other ferrous metals. Engineered for durability and performance, it is ideal for metal fabrication, automotive, and manufacturing environments.

Key Features

- 3HP motor available 1PH (110V/230V) or 3PH (230V/440V)
- 10" abrasive wheel with 5/8" spindle arbor
- Mitres from 0° to 45° left and right with positive index stops
- Heavy-duty steel base and cast aluminum saw arm
- Sealed spindle bearings for long life and low maintenance
- Dual cam-lock vises and front-mounted lever-lock table
- Standard On/Off switch
- **Optional accessories:** 12-M steel stand, KAB10N/KAB10R cutoff wheels
- **MADE in USA**

Cutting Capacities for Mild Steel

Stock Type	At 90°	At 45° Mitre
Solid Stock (e.g., round bar)	1.50 inches	Approximately 1.06 inches
Shaped Stock (e.g., angle iron, tubing)	2.50 inches	Approximately 1.77 inches
