Elevate Your Craft - Kalamazoo Industries Newsletter: August 2025

In this edition, we're excited to spotlight the Kalamazoo S8D 8×60 Vertical Dry Belt Sander—a powerhouse built for craftsmen and industrial buyers seeking superior performance in demanding surface-sanding and deburring applications. With industry leading horsepower, adjustable features and rugged construction, the S8D is ready to become the heart of your shop.

Feature Spotlight: S8D 8×60 Vertical Sander

The S8D is engineered for heavy duty surface sanding. Its 7.5 HP motor drives an 8 × 60 inch belt at up to 3,500 SFPM for rapid material removal and smooth finishes. The belt can be positioned vertically or horizontally, and a reversible steel platen lets you work against a hard surface or with the belt unsupported for contour work. An 8 × 12 inch cast-iron work table with a 5/8 inch miter gauge slot adjusts in both height and angle, giving you precision control for beveling and deburring tasks.

Why Choose the S8D?

- **Powerful motor:** 7.5 HP, 3-phase motor available in 230 V or 440 V options for heavy-duty sanding tasks.
- **Efficient belt speed:** Up to 3,500 SFPM for rapid stock removal and smooth finishes.
- **Large work area:** 8 × 60 inch belt and 8 × 13 inch work area accommodate big parts.
- **Precision setup:** Adjustable cast-iron table with miter slot enables accurate beveling, squaring and flattening operations.
- **Built to last:** Twin V-belt drive with sealed bearings and heavy-duty steel stand ensure reliability and long service life.
- **User-friendly:** One-knob belt tracking, air-powered belt tensioning and a 24 V control with jog button simplify setup and operation.
- **Safety and convenience:** Removable V-belt guard, magnetic controls and sealed bearings enhance safety and reduce maintenance.
- **Made in the USA:** Backed by a one-year parts warranty for peace of mind.

Designed For Your Applications

Whether you work with metal, wood or composites, the S8D adapts easily to your workflow. It's ideal for flattening, deburring, shaping, squaring and smoothing edges, heavy metal removal, and even polishing or rust removal. A 6-inch dust-collection port is built into the belt cover so you can connect your own vacuum and keep the work area clean.

Specifications at a Glance

Specification	Details
Motor	7.5 HP, 3-phase, 230 V or 440 V
Belt size	8 × 60 inch abrasive belt
Table size	8 × 12 inch cast-iron table with 5/8 inch miter slot
Work area	8 × 13 inch work area
Belt speed	Up to 3,500 SFPM (variable speed options up to 4,500 SFPM available)
Weight	Approx. 750 lb shipping weight

Warranty and Support

Every S8D is backed by Kalamazoo Industries' standard one-year parts warranty covering defects in materials and workmanship. Replacement parts are available from stock and ship within one to two business days. Our customer support team is ready to answer questions, provide technical assistance and help you configure your S8D for your facility's voltage requirements.

Ready to Upgrade Your Shop?

Invest in a belt sander that keeps up with your workflow. Contact our sales team today at (269) 382-2050 or request a quote online to see how the S8D can transform your finishing operations. With competitive pricing around \$8,200 and financing options available, there's never been a better time to bring the power of Kalamazoo Industries into your shop.
